

MANUFACTURING ENGINEERING TECHNOLOGIST

Operations / Manufacturing

Moncton, New Brunswick

Do you want to work for a fast paced, dynamic, and growing company that is an industry leader in our field? Greystone Energy Systems Inc. is dedicated to developing high quality and innovative solutions for its customers with unsurpassed customer service.

The Opportunity

We are growing and looking for a motivated **Manufacturing Engineering Technologist** to join the Operations team working in Moncton, New Brunswick.

Objective & Purpose

- Part of the new product introduction (NPI) team interfacing with Engineering, Production and Materials Management.
- Assist in troubleshooting internal and external non-conformances.
- Assist in Engineering Change Effectivity planning.

Principle Duties & Responsibilities

- Provide technical and process support to Manufacturing Operations during the New Product Introduction (NPI) process.
- Participate and provide manufacturability feedback in design review meetings.
- Troubleshoot technical and/or process support for internal or external non conformances.
- Work with Material Management, Manufacturing and Engineering to plan Engineering Change Effectivity.
- Assist the Manufacturing Engineering team in troubleshooting or repairing production equipment as required.

Education, Training & Experience

- Electronic Technologist Diploma or equivalent
- Minimum of five (5) years work experience in an Engineering or Manufacturing Engineering role.
- Previous ERP experience (Syspro preferred)

Preferred Skills and Competency Requirements

- Ability to read and interpret electrical schematics and PCB design documentation.
- Ability to read and interpret mechanical drawings and design documentation.
- Experience in supporting New Product Introduction (NPI's) in a manufacturing environment.

- Knowledge of electrical circuitry and componentry combined with the ability to analyze and troubleshoot electrical/PCB issues.
- Knowledge and experience with manufacturing process controls, in-process testing, data collection and lean manufacturing methodologies.
- Knowledge and strong proficiency with ERP Systems / Bills of Materials / Bills of Operations is an asset
- Critical thinking and problem-solving skills combined with a high degree of personal accountability.
- Strong conceptual and analytical skills.
- Strong team player that is production support driven.
- Highly motivated self-starter.
- Business acumen and understanding of general business practices.
- Strong verbal and written communication skills; able to effectively communicate with individuals at all levels of the organization.

Preference will be given to applicants that can prove a successful track record.

Only those who will be considered for the next step of the application process will be contacted.

Applications should be forwarded to Jodi Mattatall.
