

Quality Inspector

Operations / Quality Assurance & Sustainability

Moncton, New Brunswick

Do you want to work for a dynamic and rapidly growing company that is an industry leader in our field? Greystone Energy Systems Inc. is dedicated to developing high quality and innovative solutions for its customers with unsurpassed customer service.

The Opportunity

We are growing and looking for a motivated **Quality Inspector** to join the Quality Assurance team working in Moncton, New Brunswick.

Objective & Purpose

- This position is responsible for performing in-process and final quality inspections and determining conformance to product design specifications and customer requirements.
- This position is responsible for issuing and logging non-conformances identified during the inspection process.

Principle Duties & Responsibilities

- Complete in-process and final quality inspections of products using the specifications and inspection processes and procedures provided.
- Identify and segregate non-conforming products and inventory.
- Document the details of all non-conformances found; enter data in the non-conformance reporting tool - JIRA.
- Prepare and present reports of non-conformances found.
- Inspect and approve product repairs of previously found defects.
- Perform first article inspections (FAI) as requested.
- Maintain adherence to ISO policies and procedures.
- Escalate production quality issues to Quality Assurance (QA) Coordinator and / or QA Director.
- Assist QA Director with quality assignments, corrective actions and process improvement initiatives as requested.
- Additional duties as required.

Education, Training & Experience

- Community College Diploma or High School Diploma with minimum 2 years work experience in a production / manufacturing environment; preferably in a quality / inspection role.
- Minimum two (2) years soldering experience with demonstrable soldering proficiency.
- Knowledge of IPC A-610 Acceptability of Electronic Assemblies (Soldering of through hole and surface mount components) an asset.

Skills and Competency Requirements

- Strong attention to detail with methodical approach to daily work activities.
- Strong interpersonal, communication, and organizational skills.
- Strong understanding of Work Orders and Bills of Materials.
- Good understanding of Microsoft Office; able to learn job specific software applications quickly and proficiently.
- Proven ability to work in a high paced multi-tasking environment.
- Self-motivated and capable of working independently with limited supervision.

Only those who will be considered for the next step of the application process will be contacted.
