HIGH ACCURACY FLYING LEAD TEMPERATURE THERMOSTAT with LCD HATDFL Series

The high accuracy single point flying lead temperature transmitter incorporates a precision platinum RTD encapsulated in a 50.8 x 6 mm (2" x 0.236") OD, 304 stainless steel probe. The probe provides excellent heat transfer, fast response and resist moisture penetration. A transmitter that provides a high accuracy signal with excellent long term stability, low hysteresis and fast response for measurement of pipe temperatures. A weatherproof Polycarbonate enclosure is provide for ease of installation. An LCD is provided in either °C or °F.

TYPICAL INSTALLATION:

For complete installation and wiring details, please refer to the product installation instructions.

A typical application for the flying lead type probes is to monitor a single point temperature within the duct. Install the probe in a straight section of duct at a suitable distance downstream from any heating, cooling or humidification devices. Drill a 3/8 hole in the top of the duct and hang the sensor in the airstream.

The enclosure provides mounting tabs for ease of installation.
