

Environmental Policy

Greystone Energy Systems is committed to operating responsibly and sustainably, minimizing our environmental impact and continually improving our performance in key areas such as energy consumption, greenhouse gas (GHG) emissions, waste management, and product design.

This policy applies to all Greystone operations and employees at our production and headquarters facility. It also serves as a guide for our business partners and stakeholders.

Our Commitments

Greystone is committed to:

- ◆ Complying with all applicable environmental laws and regulations
- ◆ Preventing pollution and reducing environmental impacts
- ◆ Continually improving our Environmental Management System (EMS) and performance
- ◆ Engaging employees and stakeholders in sustainability initiatives
- ◆ Communicating our environmental performance transparently

Our Objectives

To achieve these commitments, Greystone has established measurable objectives:

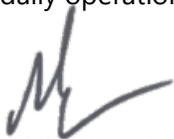

- ◆ Reduce operational energy consumption relative to net sales by 5% annually
- ◆ Achieve verified Science-Based Targets for GHG reduction by 2034 and 2050
- ◆ Maintain ISO 14001 certification
- ◆ Reduce solid waste to landfill relative to production volume by 10% annually
- ◆ Ensure compliance with all environmental regulations and directives
- ◆ Maintain open communication on environmental performance

Greystone will identify environmental impacts, implement mitigation measures, and leverage product development and supply chain practices to reduce emissions and promote ethical sourcing.

Responsibility

The Sustainability Team oversees the Environmental Policy and Objectives, ensuring implementation and regular review. However, every employee is responsible for understanding these commitments and applying them within their role.

Environmental responsibility is a core principle of our business. By embedding this policy and objectives into daily operations, we commit to preserving the environment for future generations.
