

High Accuracy Outside Air Temperature Sensor

HATSOS Series - Installation Instructions

INTRODUCTION

The high accuracy single point outside air temperature sensor utilizes a precision sensor. All probes are constructed to provide excellent heat transfer, fast response and are potted to resist moisture penetration. A sun and wind shield is integrated into a weatherproof compact polycarbonate enclosure with a hinged and gasketed cover for ease of installation.

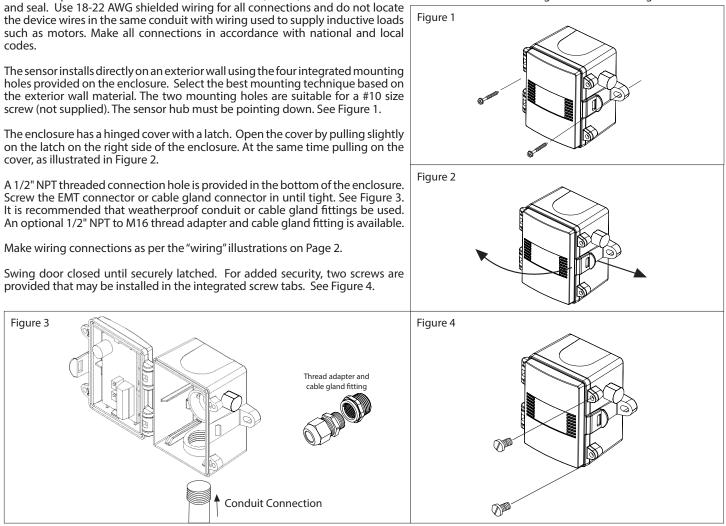

BEFORE INSTALLATION

Read these instructions carefully before installing and commissioning the temperature sensor. Failure to follow these instructions may result in product damage. Do not use in an explosive or hazardous environment, with combustible or flammable gases, as a safety or emergency stop device or in any other application where failure of the product could result in personal injury. **Do not exceed the device ratings**.

MOUNTING

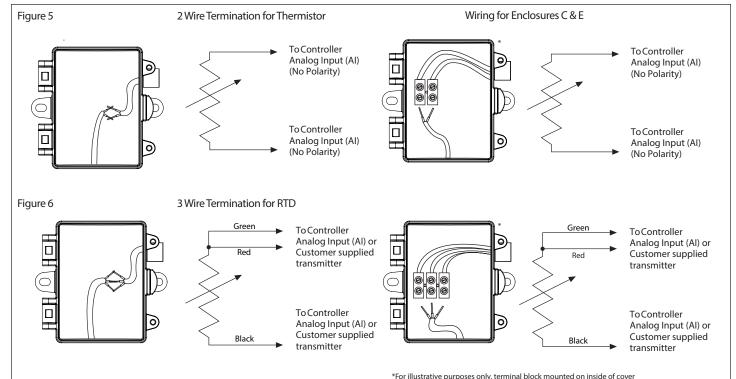

Select a suitable mounting spot on an exterior wall where the sensor is best protected from direct exposure to sunlight, wind, etc. preferably on a north facing wall. Do not mount the sensor near opening windows, supply/exhaust air louvres or other known air disturbances. Avoid areas where the sensor is exposed to vibrations or rapid temperature changes.

The sensor provides a connection hole for 22.7 mm (0.895") conduit on the back side of enclosure. Run a length of conduit through exterior wall

WIRING

- Use 18 24 AWG shielded wiring for all connections. Do not locate the device wires in the same conduit with wiring used to supply inductive loads such as motors. Make all connections in accordance with national and local codes.
- Pull at least six inches of wire into the enclosure, then complete the wiring connection according to the wiring diagrams below. All connections should be made using either butt-splices or soldering. The use of wire nuts is not recommended.
- Thermistors are a 2 wire hook up and are not polarity sensitive. See Figure 5.
- RTD's are a 3 wire hook up. Figure 6.

TYPICAL WIRE RESISTANCE VALUES

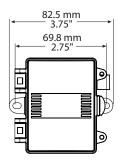

When using low resistance sensors, long wire runs can add significant error to the readings. Use the following chart to determine errors due to wire resistance or consider using a 1000 ohm sensor or a transmitter for better accuracy. Locate the type of wire being used. Multiply the total length of the wire (distance from the controller to the sensor and back) by the number found in the chart below for total resistance.

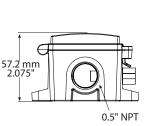

GAUGE WIRE TYPE	18 AWG	22 AWG	24 AWG
STRANDED (OHMS/FOOT)	5.85 mΩ	14.75 mΩ	23.29 mΩ
SOLID (OHMS/FOOT)	6.4 mΩ	15.85 mΩ	25.72 mΩ

NOTE: The sensor accuracies listed in the specifications section apply to the sensing element only prior to product assembly and may not be reflected in the complete assembly.

Due to the measurement uncertainty, it is possible, that the true resistance value of the single delivered sensor at 0°C can be out of the defined tolerance class. Profiling each assembly to take into consideration lead wire and the attachment method should be completed.

DIMENSIONS

SPECIFICATIONS			
Sensor Type:			
Sensor Accuracy:			
RTD 1/3 DIN: ±0.1°C (±0.18°F) @ 0°C (32°F)			
RTD 1/10 DIN: ±0.03℃ (±0.054°F) @ 0°C (32°F	=)		
NTC Thermistor Type 39: ±0.05°C (±0.09°F),			
0 to 70°C (32 to 158°F)	71		
NTC Thermistor Type 55: ±0.03°C (±0.054°F)	,		
0 to 70°C (32 to 158°F)			
NTC Thermistor Type 40/46: ±0.1°C (±0.18°F	-),		
0 to 70°C (32 to 158°F)			
Probe Sensing Range:40 to 60°C (-40 to 140°F)			
Probe Material:Machined Aluminum			
Ambient Operating Range:40 to 60°C (-40 to 140°F)			
Wire Material:			
Thermistor: PVC insulated, parallel bonded,			
22 AWG, 2 Wire			
Enclosure:			
C: Same as A, with terminal block			
E: Same as C, with thread adapter			
(1/2" NPT to M16) and cable gland fitting			
Termination:			
C & E: Terminal block, 2 or 3 wire			
Protection Class:III			
Power Source UL:SELV, Limited Energy (<15W)			
EU Conformity:CE			
Certification:UL 60730 & CSA E60730			
Purpose of Control:Temperature Sensor			
Enclosure:UL Enclosure Type 3R			
Type of Action:Type 1			
Impulse Voltage:			
Pollution Degree:4			
Country of Origin:Canada
