Enterprise Application Developer

Moncton/Manufacturing/IT/Software

The **Software Developer** will contribute to the design, development, and optimization of business-critical applications and digital solutions within a collaborative IT team. This role combines full stack development with AI and automation expertise, supporting both operational excellence and innovation initiatives. The successful candidate will help shape scalable, secure, and efficient applications that integrate with enterprise systems (ERP, ETL, and Project Management platforms), while also contributing to data-driven decision-making across Greystone Energy Systems.

Key Responsibilities

Application Development & Support

- Construct, test, and maintain scalable web and enterprise applications (front-end and back-end)
- Build, optimize, and integrate business systems including ERP, ETL, and reporting platforms
- Collaborate with IT peers to deliver seamless, user-focused solutions
- Work collaboratively with the Enterprise Application Lead

Web and App Development

- Lead the build, management and continuous improvement of the enterprise website and app

Database & Systems Integration

- Support the maintenance of SQL databases, creating and optimizing tables, stored procedures, views, and functions
- Support ERP configurations, upgrades, and customizations; ensuring data integrity and backup/recovery compliance
- Develop APIs and automation workflows to streamline business processes and integrate 3rd party applications

AI & Automation

- Apply AI models, automation tools, and scripting to improve efficiency and enhance decision-making across business units
- Experience in applying AI tools and automation frameworks to streamline workflows, enhance decision-making, and reduce manual effort
- Identify opportunities for automation in operational workflows and deploy secure, reliable solutions
- **Problem Solving & Continuous Improvement**
- Troubleshoot application and system issues; work with users to provide resolution and training
- Support ongoing IT and business process improvement initiatives

Greystone Energy Systems, Inc.

www.greystoneenergy.com

- Stay current with emerging technologies, recommending solutions that strengthen IT capability and business outcomes
- Continuously develops skills, knowledge, and technical expertise through self-paced learning, while acting as a micro-educator by sharing knowledge and best practices within the IT team

Collaboration & Communication

- Strong ability to document system setups, platform builds, and processes for repeatability and long-term sustainability
- Skilled at writing clear technical documentation and user guides to support knowledge sharing across the IT team and users
- Proven ability to work in cross-functional teams, bridging IT and business units
- Strong communication skills for translating technical requirements into business-friendly language
- Support Greystone's IT team in the execution of all operational and strategic technology tasks

Security & Compliance

- Knowledge of application and database security best practices (role-based access, encryption, audit logging).
- Familiarity with IT security standards (ISO, NIST, CIS controls) as they apply to application development and manufacturing systems

Education, Training & Experience

- Bachelor's degree in Computer Science, Information Systems, or related field; equivalent experience will be considered
- 2–4 years of experience in software development, ideally within a manufacturing or business systems environment
- Experience with ERP systems (Syspro preferred), ETL/reporting tools (Power BI preferred), AWS, and common DevOps tools
- Hands-on experience with AI/automation tools, scripting, and workflow optimization
- Familiarity with enterprise IT environments, including networking, cloud services, and system security

Why Join Us?

- Be part of an innovative, growing global company.
- Collaborate in a supportive team environment that values knowledge-sharing.
- Work on impactful projects that shape scalable digital solutions and drive efficiency.
- Opportunities for professional growth and skill development.
